Experience

Deep Learning Engineer

distributed systems java python angular

SkyMind Inc. | AI PAAS

Remote | Nov 2017 - present

- Heavily involved (across the full stack) in developing and scaling up the flagship distributed model serving platform, SKIL (SkyMind Intelligence Layer).
- Developed a jobs platform that allows users to provision resources and run distributed training/inference on the cloud (AWS, Azure, Google Cloud).

SDE-3

async services integrations python

Loanzen Inc. | B2B FinTech

Remote | May 2017 - Oct 2017

- Developed an inventory management portal (integrating with banks, government services) and a centralised financial platform to process (and audit) all business transactions.

SDE-2

scalability java REST

Flipkart | Advertising Platform

Bangalore, India | Mar 2015 - Apr 2017

- Developed and led a forecasting platform for predicting traffic across user segments, processing > 1TB/day.
- Worked extensively on the campaign management backend, scaling it to handle > 1000 QPS.

Team Lead

data engineering platformization python

Goibibo | Data Platform

Bangalore, India | Jan 2011 - Feb 2015

- Started and subsequently led the data engineering team, processing > 4m events per day.
- Set up automated, (near) real time accounting and auditing across the organisation.
- Built the audience targeting and flight fare prediction services.
- Built Wuphf (a real-time alerting service) and Gandalf (an in-house analytics tool).

Open Source

full-stack react golang

Hobby Project | Personal music player

Github and Heroku | May 2015 - Oct-2017

- Web-based, leverages multiple providers for music streaming, metadata and discovery.

Education

Indian Institute of Technology, Kanpur

B.Tech (Aerospace Engineering)

2010
